Our Most Popular Vinyl Banners: 13oz High Quality Vinyl Banners

Our banners are all made with high quality materials and printed here in the USA. But which one is best for you? Choosing which banner material is best for your needs depends on if the banner is for indoor or outdoor use? For indoors, 13oz has the best look. Any of these banners are great for outdoor use.

Our banners come standard with heat welded hems to add strength to the edges of the banner for a longer life. We also provide grommets and these metal rings strengthen the holes in the fabric used for hanging by keeping them from fraying. Quality is a top concern of ours, and our banners are tear-resistant and more durable than more cheaply made materials. We make our banners to last. While other competitors might want you to have to buy the same banner again when the materials give out, we want to impress you with your long lasting product so that the next time you need a new banner you'll think of us.

We offer easy uploading of files as well as free design services so that the process is smooth from start to finish. Once you submit your order, our designers will make sure that the image will look good on the banner and will let you know if there are any concerns with the print. This personal attention happens with every order at no extra charge.

Getting a customized banner shouldn't be stressful, and we'll help any way we can to deliver the best quality product as fast or faster than anyone else out there.

So which material is best for your project? If you're still not sure or have special questions give us a call and we'll help see which is best for your needs.
